Author John Pinel and his artist/designer wife, Maggie Edwards, created many of these illustrations exclusively for this text. While some biopsychological textbooks emphasize neurophysiology, neurochemistry, and neuroanatomy, Biopsychology gives top billing to coverage of behavioral research. The authors stress that neuroscience is a team effort and that the unique contribution made by biopsychologists to this effort is their behavioral expertise.

Biopsychology clearly presents the fundamentals of the study of the biology of behavior and makes the topics personally and socially relevant to the student. The defining feature of Biopsychology is its unique combination of biopsychological science and personal, reader-oriented discourse. It is a textbook that is "untextbooklike." Rather than introducing biopsychology in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, social issues, personal implications, and humorous anecdotes. It tries to be a friendly mentor that speaks directly to the reader, enthusiastically relating recent advances in biopsychological science.

For courses in Physiological Psychology and Biopsychology. A student-focused approach to how the central nervous system governs behaviour Biopsychology, 11th Edition presents a clear, engaging introduction to the discipline through a unique combination of biopsychological science and personal, reader-oriented discourse. Addressing students directly, authors John Pinel and Steven Barnes interweave the fundamentals of the field with clinical case studies, social issues, personal implications, useful metaphors, and memorable anecdotes. The 11th Edition incorporates two new emerging themes ("thinking about epigenetics" and "consciousness") and includes up-to-date coverage of recent developments in the field.

Pinel's textbook presents the fundamentals of the study of the biology of behaviour and makes the topics personally and socially relevant to the student. A key feature of 'Introduction to Biopsychology' is its combination of biopsychological science and personal, reader-oriented discourse.
