To give children with congenital developmental conditions that manifest special learning needs and specific disabilities their best chance to succeed, early identification and appropriate interventions and support, is necessary. This text highlights what to look for when there are concerns about a child ' s development. Practical and accessible, it is divided into three sections: Part 1 looks at the theory and policy context, discussing the social model of disability, the responsibility of health, social care and education services to the child and family and the role of reviews and assessment in recognising developmental disorders. Part 2 provides a reference guide to atypical developmental conditions and disorders. For each condition, aetiology, prominent theories and research, profile of features — including triggers and behaviours,

diagnostic assessment procedures and appropriate interventions are given and links made to sources of further information and support. Part 3 explores practical issues how to work sensitively and effectively with children and their families, looking at the psychological implications of diagnosis, and how to plan, promote, deliver and evaluate multi-agency support. Designed to support professionals working within a multi-modal, collaborative approach to assessment and intervention processes, it is suitable for health visitors, allied health therapists, nurses, teachers and social care practitioners. It is also a useful reference for students in these areas learning about child development and includes critical reading exercises; online searching tasks; self-assessment questions; reflective activities and document analysis prompts.

This new edition of Dr. Larry Silver's groundbreaking clinical book incorporates recent research findings on attention-deficit/hyperactivity disorder (ADHD), covering the latest information on diagnosis, associated disorders, and treatment, as well as ADHD in adults. Providing a broad overview of the continuum of neurobiologically based conditions, Attention-Deficit/Hyperactivity Disorder thoroughly reviews disorders often found to be comorbid with ADHD, including specific learning disorders, anxiety disorders, depression, anger regulation problems, obsessive-compulsive disorder, and tic disorders. Dr. Silver emphasizes that ADHD is a life disability that affects not only school performance but also family life, peer interactions, and successful

participation in sports and other activities. For about half of the individuals with this disorder, it is also a lifetime disability -- thus, interventions must be considered for each phase of life. Addressing day-to-day management issues faced by physicians and mental health professionals who see patients with ADHD, this guidebook discusses such practical concerns as how to make a differential diagnosis, work with children and families in a multimodal treatment setting, manage a medication regimen, and explain ADHD to parents. Covering ways to work with the school system as well as new and controversial therapies, this up-to-the-minute book is essential reading for all who care for individuals with ADHD.

Describes the causes of dyslexia, and suggests that the treatment developed by the author has been unjustly suppressed by the
