Modern architectures that support evolution must accommodate all these important dimensions of architecture--continuously. When building an evolutionary architecture, architects must consider each dimension affected. For example, it isn't useful to build an evolvable technical architecture with an

## Building Evolutionary

The timely "Building Evolutionary Architectures" sits at the intersection of two key trends in the software industry. At one hand software engineers face increasing demand for delivery and quality at 'Internet' pace and scale. The only way to address this is to build evolving architectures. We do not have all the answers at the beginning, nor do
