In a city mired in endless decay, where the youth suffer through all the horrors of urban blight, hope comes in a most unassuming form: a tiny brick schoolhouse run by two Felician nuns where a singular basketball genius takes teenagers from the mean streets of Jersey City and turns them into champions on the hardcourt. Coach Bob Hurley had been working miracles at St. Anthony High School for over thirty years, winning state and national championships and offering his players rescue from their surroundings through college scholarships, when he met his most dysfunctional team yet. In *The Miracle of St. Anthony* Adrian Wojnarowski follows Hurley through a gripping and heartrending season as he struggles to lead a troubled team to glory

through his unparalleled understanding of the game and his ceaseless determination to see no more children lost to these streets. In *The Miracle of St. Anthony*, acclaimed sports journalist Adrian Wojnarowski follows Hurley through a gripping and heartrending season, as he struggles to lead a troubled team to glory through his unparalleled understanding of the game and his ceaseless determination to see no more children lost to the city streets.

For many years now Enterprise Information Systems have been critical in helping businesses successfully navigate the global market. The development that started with design and implementation of integrated systems has evolved to incorporate a multitude of perspectives and ideas. The Enterprise Information Systems functionality extends from principally an ERP (Enterprise Resource Planning) system to a portfolio of standard systems including CRM (Customer Relationship Management) systems and SCM (Supply Chain Management) systems. Advances in Enterprise Information Systems II is divided into seven thematic sections, each exploring a distinct topic. In "Concepts in Enterprise Information Systems" the authors present new concepts and ideas for the field. "Cases in Enterprise Information Systems" introduces studies of enterprise information systems in an organizational context. "Business Process Management" is one of the

major themes within enterprise information systems and “Designing Enterprise Information Systems” discusses new approaches to the design of processes and system and also deals with how design can be taken as a specific perspective. “Enterprise Information Systems in various domains” features generic studies that contribute to advancing the practical knowledge of the field as well as towards “Global issues of Enterprise Information Systems”. Finally, in “Emerging Topics in Enterprise Information Systems”, new technologies and ideas are explored. Cloud computing in particular seems to be setting the agenda for future research in enterprise information systems. The book will be invaluable to academics and professionals interested in recent developments in the field of enterprise information systems.

Discover a world of sex, excess and urban paranoia where worlds collide, relationships fragment and the dark underbelly of the American dream is exposed. A transsexual prostitute accidentally propositions his own father. A senator's serial infidelities leave him in hot water. And two young lovers spend Christmas together high on different drugs. McInerney's characters struggle together in a shifting world where old certainties dissolve and nobody can be sure of where they stand.

This booklet is a supplement to the WHO monograph Tools for assessing the O&M status of water supply and sanitation in developing countries which comprises nine tools for measuring and evaluating the effectiveness of operations and maintenance (O&M) of water supply and sanitation services. The WHO tools are: Tool 1: Effectiveness of the O&M management system. Tool 2: Guidelines for an audit of O&M. Tool 3: A framework for assessing the status of O&M. Tool 4: Guidelines on

O&M performance evaluation. Tool 5: Guidelines on O&M performance reporting. Tool 6: Guidelines for the selection of performance indicators. Tool 7: Performance indicators for water supply and sanitation. Tool 8: Potential information sources. Tool 9: Participatory information-gathering. Tool 7 suggests performance indicators which are specific to water supply and sanitation; all other tools are generic and apply equally to any other of the urban services. Tool 7A has been produced as a supplement to Tool 7 which provides some indicators in relation to these other urban services. On inspection of Tools 7 and 7A, however, it can be seen that it is relatively straightforward to develop equivalent performance indicators oneself for one's own use. An additional Tool 10 has also been prepared to offer advice on indicators for technical, financial and institutional sustainability.

The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that

limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. The Future of Disability in America is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.
