The best way to protect against the boom and bust cycle is to rebalance your investment portfolio once or twice a year. It will automatically make sure you buy low and sell high. For example, if commodities do well and stocks do poorly, your portfolio will have too high a percentage of commodities.

Causes and Impact of Boom and Bust Cycle #1 – Money Supply.

This is the most important factor which leads to the cyclical
behavior of GDP. Lower policy rate, and in turn lower lending rate
of commercial banks, stimulates investment in the form of CAPEX
in the economy. The production expands, employment and working
hours increase, wages increase, consumption also increases.

To make the most of these little fixes we have to understand something called the 'Boom and Bust Cycle'. People with chronic pain tend to fall into activity patterns that exacerbate their symptoms 1. Boom and bust is one example of this. It's something that a LOT of people fall into regardless of whether they have any health problems at all.
