The case caught the attention of David Paulides, author of The Missing 411 books, who was intrigued because the location of the vanishing was at a place called " Devil ' s Head, " which has long had a place in Native folklore as a haunted place inhabited by evil spirits, and which also strangely enough had other strange disappearances that had happened in the vicinity.

On March 1, 2012 David released "Missing 411-Western U.S.", the story of people who have disappeared in the wilds of North America. Many of the parents and relatives of the missing make claims that the victim was kidnapped/abducted, in very remote areas, this is well documented.

(www.canammissing.com) Missing-411 is the first comprehensive book about people who have disappeared in the wilds of North America. It's understood that people routinely get lost, some want to disappear but this story is about the unusual. Nobody has ever studied the archives for similarities, traits and geographical clusters of missing people, until now.A tip from a national park ranger led to this three year, 7000+ hour investigative effort into understanding the stories behind people who have vanished. The book chronicles children, adults and the elderly who disappeared, sometimes in the presence of friends and relatives. As Search and Rescue personnel exhaust leads and places to search, relatives start to believe kidnappings and abductions have occurred. The belief by the relatives is not an isolated occurrence; it replicates itself time after time, case after case across North America.The research depicts 28 clusters of missing people across the continent, something that has never been exposed and was a shocking find to researchers. Topography does play a part into the age of the victims and certain clusters have specific age and sex consistency that is baffling. This is not a phenomenon that has been occurring in just the last few decades, clusters of missing people have been identified as far back as the 1800's. The manuscript for the research was extremely large so the story was split between two books, Missing 411 Western United States and Canada and Missing 411 Eastern United States. The Eastern version will be released in late March and will include a list of all missing people in each edition and a concluding chapter that draws both books together for conclusions.Some of the issues that are discussed in each edition:" The National Park Service attitude toward missing people" How specific factors in certain cases replicate themselves in different clusters" Exposing cases involving missing children that aren't on any national database* Unusual behavior by bloodhounds/canines involved in the search process* How storms, berries, swamps, briar patches, boulder fields and victim disabilities play a role in the disappearance* The strategies of Search and Rescue personnel need to change under specific circumstances Major news organizations do a deplorable job of coveringstories and issues which are deemed too unusualor too far outside the box. Chances are, they will find a wayto trivializeor ignore the disturbing evidence accumulatedby David Paulides, a former lawman turned investigativejournalist. The paper trail uncovered by Paulides throughsheer doggedness is impressive, the evidence indisputable.People are vanishing without a trace from our nationalparks and forests, yet government agencies are saying nothing.At a minimum, this story deserves space on the frontpage of every newspaper in the country, and it warrants aormal high level inquiry by the federal agencies whose fileleave little doubt that something very strange is unfoldingin our wilderness.George Knapp, Host, Coast to Coast AMAfter reading this book, you will forever walk in the woods with a different awareness.

(www.canammissing.com- missing person site)Author David Paulides has released the sixth installment in his best selling series, Missing 411. The books have revealed the names and facts behind people who have disappeared in the national parks and forests of the world. The identification of over 59 geographical clusters of missing people in North America is one of the mysterious, unsettling and unexplained elements in the Missing 411 series. Missing 411- Hunters explains a subset of the research and documents 148 cases of hunters who have vanished in four countries. The incidents parallel other disappearances documented in prior Missing 411 books. The vast majority of the cases in this edition are new and they don't appear in other books in the series. The mystery and stories of the victims will baffle and confound the avid outdoorsman and seasoned hunter.Countries Included:United States- 26 StatesCanada- 9 ProvincesAustraliaAzerbaijanDisappearances Documented:148348 PagesOther Books in the Series:Missing 411- Western United StatesMissing 411- Eastern United StatesMissing 411- North America and BeyondMissing 411- The Devil's in the DetailMissing 411- A Sobering Coincidencewww.canammissing.com

It is a significant step forward in the understanding of the missing phenomena that adds several new elements never before identified. The book ends with series of charts that expose specific elements that are identified in each of the other books, their frequency, location and timing. **It is highly recommended that you read any of the other "Missing 411" books prior to this. (www.canammissing.com) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event.After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement.There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches.There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same.Chapters:1. Introduction1A. Clusters1B. Unique Factors in Disappearances2. Missing People3. Unique Groups of Missing People3A. Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. The books have been vetted by some of the top journalists in the world with statements such as; "David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time." Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed." The author continues with his profile points involving the disappearancs and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these cases believe their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for. This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities.Readers can follow missing person cases and purchase the books at: www.canammissing.com, \$24.95Overview127 cases62 Different colleges and universities represented.Span of cases, 1928-2015Countries Represented:United States- 25 StatesCanada Alberta British Columbia New Brunswick Ontario QuebecFranceSpainUnited KingdomOther books in the series:Missing 411- Western United StatesMissing 411- Eastern United StatesMissing 411- North America and BeyondMissing 411- The Devil's in the Detail379 PagesAuthor: David PaulidesDate Published: August 29, 2015.

(www.canammissing.com)This is the third "Missing 411" book researching facts of people who have vanished in remote locations of the world. "Missing 411-North America and Beyond" is the first edition that discusses missing people and relevant facts from five countries (Australia, England, France, Iceland and Indonesia) outside of North America and examines the parallels between the cases. The book also includes a multitude of new stories from North America.There is a continuing trend of clusters of missing people in United States National Parks. The National Park Service has continued with their policy of failing to keep ledgers, track or otherwise document lists of missing people inside their parks and monuments. This edition has cases from Florida, Texas, Hawaii and forty other states. There are new clusters of missing people from Sequoia and Mount Rainier National Park, Three Sisters Wilderness (OR) and Adirondacks (NY). Canada has missing cases from six provinces that are documented.This new book brings further clarity to the missing person issue by examining multiple disappearances of people in small-confined areas and exposing the similarities of their case. David Paulides also exposes a series of coed disappearances that date back to the early 1900's, which have unusual facts surrounding their case. "Missing 411-North America and Beyond" is the largest and most comprehensive of the trilogy, 472 pages. The Missing 411 series builds upon itself. It is recommended that you read "Missing 411-Western United States" first, then the eastern version and then "North America and Beyond." There is a historical aspect to this issue and there are common elements that run through the disappearances. *****One of the early reviews of "Missing 411-North America and Beyond" was written by New York Times Best Selling author Whitley Strieber:David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time: the simple and awful fact that people disappear, especially in our national parks, and little effort is made to find them, let alone inform the public about the danger.Even when massive searches are mounted, and people are found, the events surrounding their loss and recovery are often far beyond logical explanation.This is the most comprehensive and

expertly presented series of books on the subject ever written, and the latest volume, which includes stories from five countries, is sobering, chilling and far too well researched to ignore. Essential reading. Whitley Strieber New York Times Best Selling Author*****

A non-fiction book about people who are missing by way of land, air and water.

Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary, Off the Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included. Updated tables from past books assist the reader in understanding the vast numbers of missing that fit the established profile. Early reviewers of this book have called it the most intriguing and thought-provoking of the series. Author David Paulides is an investigative reporter, twenty-year police officer/detective and the director of the Canam Missing Project (www.canammissing.com), the organization behind the search for understanding the missing person issue. He recently released a movie based on the books, Missing 411, which a former LA Magazine and NBC movie critic rated it the best documentary for 2017. He has presented his findings to the most attended annual search and rescue conference in the world, NASAR and has spoken at hundreds of seminars, symposiums, and meetings. Mr. Paulides has a bachelors and masters degree from the University of San Francisco and currently resides in Denver. This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. This astounding work brings professional investigative abilities and forensic artistry to the field of Bigfoot studies. David Paulides, a former police investigator, has applied his skills to questioning Bigfoot witnesses. The results he has achieved in gaining access to witnesses and getting detailed information from them is both remarkable and intriguing. Furthermore, he commissioned a forensic police artist to meet with witnesses and sketch the creatures they saw. These drawings provide insights into the creature's nature never before realized. The result of this team's work is by far one of the most convincing accounts ever written on Bigfoot. The conclusion reached - that this creature, long revered by the Hoopa people, definitely inhabits the forested regions of Humboldt County in Northern California - is so convincing that those people who doubt Bigfoot's existence will be forced to think again!
