James Earl Ray shot Martin Luther King at the Lorraine Motel. The nation was shocked, enraged, and saddened. As chaos erupted across the country and mourners gathered at King's funeral, investigators launched a sixty-five day search for King's assassin that would lead them across two continents. With a blistering, cross-cutting narrative that draws on a wealth of dramatic unpublished documents, Hampton Sides, bestselling author of *Ghost Soldiers*, delivers a non-fiction thriller in the tradition of William Manchester's *The Death of a President* and Truman Capote's *In Cold Blood*. With *Hellhound On His Trail*, Sides shines a light on the largest manhunt in American history and brings it to life for all to see.

A magnificent history of the American conquest of the West; "a story full of authority and color, truth and prophecy" (The New York Times Book Review). In the summer of 1846, the Army of the West marched through Santa Fe, en route to invade and occupy the Western territories claimed by Mexico. Fueled by the new ideology of "Manifest Destiny," this land grab would lead to a decades-long battle between the United States and the Navajos, the fiercely resistant rulers of a huge swath of mountainous desert wilderness. At the center of this sweeping tale is Kit Carson, the trapper, scout, and soldier whose adventures made him a legend. Sides shows us how

this illiterate mountain man understood and respected the Western tribes better than any other American, yet willingly followed orders that would ultimately devastate the Navajo nation. Rich in detail and spanning more than three decades, this is an essential addition to our understanding of how the West was really won.

The ghost of a young soldier from the Civil War haunts a troubled teen. "I sat up. The jagged trenches were only soft grassy depressions in the sunny battlefield park. returns with a white-knuckle tale of polar exploration and survival in the Gilded Age In the late nineteenth century, people were obsessed by one of the last unmapped areas of the globe: the North Pole. No one knew what existed beyond the fortress of ice rimming the northern oceans, although theories abounded. The foremost cartographer in the world, a German named August Petermann, believed that warm currents sustained a verdant island at the top of the world. National glory would fall to whoever could plant his flag upon its shores. James Gordon Bennett, the eccentric and stupendously wealthy owner of The New York Herald, had recently captured the world's attention by dispatching Stanley to Africa to find Dr.

Livingstone. Now he was keen to re-create that sensation on an even more epic scale. So he funded an official U.S. naval expedition to reach the Pole, choosing as its captain a young officer named George Washington De Long, who had gained fame for a rescue operation off the coast of Greenland. De Long led a team of 32 men deep into uncharted Arctic waters, carrying the aspirations of a young country burning to become a world power. On July 8, 1879, the USS Jeannette set sail from San Francisco to cheering crowds in the grip of "Arctic Fever." The ship sailed into uncharted seas, but soon was trapped in pack ice. Two years into the harrowing voyage, the hull was breached. Amid the rush of water and the

shrieks of breaking wooden boards, the crew abandoned the ship. Less than an hour later, the Jeannette sank to the bottom, and the men found themselves marooned a thousand miles north of Siberia with only the barest supplies. Thus began their long march across the endless ice—a frozen hell in the most lonesome corner of the world. Facing everything from snow blindness and polar bears to ferocious storms and frosty labyrinths, the expedition battled madness and starvation as they desperately strove for survival. With twists and turns worthy of a thriller, *In The Kingdom of Ice* is a spellbinding tale of heroism and determination in the most unforgiving territory on Earth.
