2012 – Ten Years of Critical Reflection. It is a decade since the debut of the landmark Global Civil Society yearbook. During that time, as the yearbook has attempted to debate, map and measure the shifting contours of this contested phenomenon, relationships between state and society have shifted. On both sides promises have been made and broken, expectations raised and shattered, partnerships brokered and roles reversed.

Global civil society 2012: ten years of critical ...

This article argues that global civil society should be understood as a force for democratic change, one which is implicitly making claims to global citizenship. It explains that global civil society has greater subsidiarity between local, national, regional, and global political arenas and it has forced global institutions to recognize that technical deliberations and the standards they ...

Global civil society is a manifestation of social energies released by an awakening of human consciousness to possibilities for creating societies that nurture and rejoice in a love of all beings. The energy thus released is flowing toward what writer and Buddhist scholar Joanna Macy calls the “Great Turning.”

Global Civil Society: The Path Ahead – David Korten

Of the 20 voting seats on the Global Fund Board, ten are allocated to implementer constituencies – of which three are held by community and civil society representatives. One seat represents nongovernmental organizations from the developed world, one represents nongovernmental organizations from the developing world, and the third seat represents communities living with or affected by the ...

Civil Society – The Global Fund to Fight AIDS ...

Civil society refers to the space for collective action around shared interests, purposes and values, generally distinct from government and commercial for-profit actors. Civil society includes charities, development NGOs, community groups, women's organizations, faith-based organizations, professional associations, trade unions, social movements, coalitions and advocacy groups.

WHO | Civil society

John Keane, a leading scholar of political theory, tracks the recent development of a big idea with fresh potency – global civil society. In this timely book, Keane explores the contradictory forces currently nurturing or threatening its growth, and he shows how talk of global civil society implies a political vision of a less violent world, founded on legally sanctioned power-sharing ...

Global Civil Society: the three words mark out a field and an aspiration.Global rather than national, civil not the state and corporation, society not the individualism of the late consumer market.

Activists and academics look back over ten years of 'politics from below', and ask whether it is merely the critical gaze upon the concept that has changed – or whether there is something genuinely new about the way in which civil society is now operating.

Activists and academics look back over ten years of 'politics from below', and ask whether it is merely the critical gaze upon the concept that has changed – or whether there is something genuinely new about the way in which civil society is now operating.

The Union of International Associations (UIA) was founded in 1910, aiming to coordinate the relations and interests of international organizations across the world. Its long history makes it a prism through which to study the field of international organizations and its dynamics. Bringing together experts from fields including history, political science and international relations, architecture, historical sociology, digital humanities and information studies, International Organizations and Global Civil Society is the first scholarly book to cover both the UIA's early years and its more recent past. Key issues explored include the UIA's importance for the field of scientific internationalism, the relations between the UIA and other international organizations, and the changing position of the UIA when facing geopolitical challenges such as totalitarianism, the World Wars and the Cold War. This important book addresses a number of current scholarly concerns: the concept of "global civil society"; the development of international relations as a field of study; the investigation of transnational factors in modern and contemporary history; and the tracing of forerunners to the "information society".

In recent years civil society has been seen as a key route for democracy promotion and solving development ‘problems’ in low-income countries. However, the very concept of civil society is deeply rooted in European traditions and values. In pursuing civil society reform in non-Western countries, many scholars along with well-meaning international agencies and donor organisations fail to account for non-Western values and historical experiences. Civil Society in the Global South seeks to redress this balance by offering diverse accounts of civil society from the global South, authored by scholars and researchers who are reflecting on their observations of civil society in their own countries. The countries studied in the volume range from across Africa, Latin America, Asia and the Middle East to give a rich account of how countries from the global south conceptualise and construct civil society. The book demonstrates how local conditions are often unsuited to the ideal type of civil society as delineated in Western values, for instance in cases where numerous political, racial and ethnic sub-groups are ‘fighting’ for autonomy. By disentangling local contexts of countries from across the global South, this book demonstrates that it is important to view civil society through the lens of local conditions, rather than viewing it as something that needs to be ‘discovered’ or ‘manufactured’ in non-Western societies. Civil Society in the Global South will be particularly useful to high-level students and scholars within development studies, sociology, anthropology, social policy, politics, international relations and human geography.

Civil Society has become a standard work of reference for those who seek to understand the role of voluntary citizen action. Recent global unrest has shown the importance of social movements and street protests in world politics. However, as this lucid book shows, the power that people have to shape their societies is usually channeled through day-to-day participation in voluntary associations and communities: expressions of “normal” civic life beyond the headlines. This is the underlying story of civil society. This new edition explores issues that have developed rapidly in recent years, including the overlaps between civil

society and the market in the form of social enterprises and “venture philanthropy,” and the increasing role of social media and information and communication technologies in civic interaction. Different varieties of civil society in the Middle East, Africa and elsewhere are investigated in more detail, and case studies, data, and references have been updated throughout. Colleges, foundations and NGOs, policy-makers, journalists and commissions of inquiry Ð all have used Edwards’s book to understand and strengthen the vital role that civil society can play in deepening democracy, re-building community, and addressing inequality and injustice. This new edition will be required reading for anyone who is interested in creating a better world through voluntary citizen action.

This book analyzes the impact of the Fukushima disaster on civil society in Japan with particular attention to the anti-nuclear movement, focusing on its development, repertoire of action, mobilization strategies, modes of operation, and impact on the state’s energy policy. Combining social movement theory and civil society theory, the author draws on extensive fieldwork in Japan to explore the context of the sociopolitical situation in Japan up to the Fukushima accident and to offer a typological description and analysis of the anti-nuclear movement that emerged after the disaster. Through an analysis of the relationship between the power elitez and the anti-nuclear movement organizations, this volume considers the influences exercised by the ruling elites on civil society and vice versa, thus assessing the effects of the anti-nuclear movement on the state policy and the society. A comprehensive account of the anti-nuclear movement in post-Fukushima Japan, embedded within a broader perspective of the movement’s historical development, contemporary political structures, and opportunities, Fukushima and Civil Society will appeal to scholars of sociology and politics with an interest in social movements.

Global Civil Society 2011 combines activist and academic accounts of contemporary struggles to promote, negotiate and deliver justice in a global frame without a central authority. In their engagement with cultural diversity and their networked communication the contributors rethink and remake justice beyond the confines of the nation state.

One of the signal events in global politics in the last decade has been the transformation of political and civic activism. Not only is the new activism qualitatively different in character from what it was in 2000; its intensity and frequency have dramatically increased. Activists are developing a new type of civic movement, applying innovative forms of direct action against governments and often operating without leaders or even any well-defined set of aims. In Civic Activism Unleashed, Carnegie scholar Richard Youngs examines the changing shape of contemporary civic activism. He shows how the emerging civic activism has important implications for the whole concept of civil society-and for the relationship between citizens, political institutions, and states. Youngs contends that the rise and spread of these new forms of direct-action civic activism, and the way the trend has driven the dramatic events in global politics in recent years, requires us to update our understanding of what civil society actually is and which types of organizations are in its vanguard. He further looks at the global impact of recent civic activism and offers a set of variables to help explain cases of success and failure. Youngs' larger aim is to explore in depth the new forms of civic activism that are emerging around the world and assess how they differ from more established practices of civil society activity. Theoretically ambitious and global in scope, Civic Activism Unleashed forces us to reconsider the nature of contemporary social and civic activism and how it is reshaping contentious politics in countries across the world.

In Serbia, as elsewhere in postsocialist Europe, the rise of “civil society” was expected to support a smooth transformation to Western models of liberal democracy and capitalism. More than twenty years after the Yugoslav wars, these expectations appear largely unmet. Frontiers of Civil Society asks why, exploring the roles of multiple civil society forces in a set of government “reforms” of society and individuals in the early 2010s, and examining them in the broader context of social struggles over neoliberal restructuring and transnational integration.
