How effective are public managers as they seek to influence how public organizations deliver policy results? How, and how much, is management related to the performance of public programs?

What aspects of management can be distinguished? Can their separable contributions to performance be estimated? The fate of public policies in today's world lies in the hands of public organizations, which in turn are often intertwined with others in

the public sector. Firstly, they develop a systematic theory on how effective public managers are in shaping policy results. The rest of the book then tests this theory against a wide range of evidence, including a data set of 1,000 public organizations.

What motivates public employees to work hard? This Element

(motivated by outcomes) and intrinsic (motivated by work itself) reasons. Public administration research sheds significant light on extrinsic motivators: working hard to help society (public service motivation), one's organization (organizational commitment) and

Future research should focus on hitherto understudied motivators: symbolic rewards and intrinsic motivators, such as enjoyable work tasks, warm glow, and relatedness with colleagues.
