The biography of Anthony's life by Athanasius of Alexandria helped to spread the concept of Christian monasticism, particularly in Western Europe via its Latin translations. He is often erroneously considered the first Christian monk, but as his biography and other sources make clear, there were many ascetics before him. Anthony was, however, the among the first known to go into the wilderness (about AD 270), which seems to have contributed to his renown. Accounts of Anthony enduring supernatural temptation during his sojourn in the Eastern Desert of Egypt inspired the often-repeated subject of the temptation of St. Anthony in Western art and literature.

This book revolutionizes our understanding of the life and thought of the great anchorite father of the Egyptian desert. It is a signal contribution to our knowledge of Egyptian Christianity in the third and fourth centuries.—Birger Pearson, Institute for Antiquity and Christianity Samuel Rubenson, by means of a fresh analysis of the letters of St. Antony, exposes the distortion of the picture of early Christian monks as unlettered and primitive. Rubenson describes the desert monasteries as centers of theological reflection in Egypt, showing how they combined the speculative philosophy of the Greeks and the biblical tradition. Included in this volume is a new translation of the letters themselves, which are shown to be authentic and an important source for the study of the desert fathers and the early monastic tradition. The later image of Antony is demonstrated to be influenced by church politics of the latter part of the fourth century. Samuel Rubenson is Associate Professor at Lund University, Lund, Sweden.

The classic, fascinating life of St. Antony of the Desert, and the Father of Monasticism, both East and West. St. Antony revealed that there are swarms of devils everywhere, but that they are powerless to harm us when we use the Holy Name of Jesus and sacramentals to ward them off.
