By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, Fifty Years of Farm Tractors. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

It's the undisputed king of Internet auction sites. It's a global bazaar offering a range of goods from Antiques to Zulu Daisies. Cars, clothing, collectibles: you name it, and it's likely that you can find on eBay. But along with the vast selection of goods available, buyers and sellers also encounter all the other elements that markets are known for: tricks and swindlers, overpriced goods, deceptive labeling, small print, recycled items marked as new, and the occasional rare priceless find or undiscovered treasure. Seasoned eBay traders know that to successfully buy and sell within this mega-shopping platform, you need to understand the system. Unfortunately, the secrets of the site are often tightly held by other buyers and sellers seeking a competitive edge. But what if you're a newcomer? Or an experienced trader who wants to make the jump to power buyer or seller? eBay: The Missing Manual gives you the inside information you'll need to become an eBay expert. Buyers will find the most effective ways to find you want and pay prices that are sure to bring a smile to your face. And you'll get authoritative advice on strategic bidding: how to watch for elusive items, time your bids to take the competition by surprise, and--above all--avoid paying more than you ought to. Sellers will get sure-fire tips from eBay veterans who have discovered ways to ramp up their own auctions and sell at the highest possible prices. From the smallest details, such as how to take and post the most effective photos of your goods, to pricing strategies, inventory management, and shipping methods, this user-friendly manual will help you make more money on eBay. Whether you're selling a single item or running fulltime business on the site, you'll find tips to help you do it more effectively. As in any community, problems and disputes

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'
