(PDF) Corpora in language research in Malaysia

About the Malay Language. There were around 200–250 million speakers of Malay in 2009, according to the linguist James T. Collins' research. And that figure has likely increased over the past 11 years, due to growing population sizes. Yet if you disregard all the people who speak Malay as a second language, this number drops to just 77 million.

Bahasa Melayu: Learning the Malay Language from Scratch

IN PRESENT DAY MALAYSIA: The Hokkien dialect is still the most spoken dialect among the Chinese community, although it is no longer in its pure form. Hokkien spoken today contains loanwords from the Malay language (especially Penang Hokkien) and may differ according to region. For example, the Hokkien variant spoken in northern states like Penang and Kedah is starkly different from the variants spoken in Klang, Melaka, Johor, and Kuching.

The Origins Of The Hokkien, Cantonese, And Other Chinese ...

formant characteristic of Malay language. Previous research of Malay language only investigated six basic vowels /a/, /e/, /i/, /o/, /u/, /ʔ/. The vowels /ʔ/, /ʔ/ that usually exist in a dialect were not included in the previous investigations. In this study, the vowels sound were collected

Formant characteristics of Malay vowels

Those speaking Malay as a first language probably make up around half the population, including Malays in states such as Kelantan and Sarawak who use a dialect very different from the standard form, but who are generally fluent in standard Malay too.
