The central theme of this book is the solution of Diophantine equations, i.e., equations or systems of polynomial equations which must be solved in integers, rational numbers or more generally in algebraic numbers. This theme, in particular, is the central motivation for the modern theory of arithmetic algebraic geometry. In this text, this is considered through three of its most basic aspects. The book contains more than 350 exercises and the text is largely self-contained. Much more sophisticated techniques have been brought to bear on the subject of Diophantine equations, and for this reason, the author has included five appendices on these techniques.

Traditional database management systems can't handle the demands of managing multimedia data. with the rapid growth of multimedia platforms and the world wide web, database management systems must now process, store, index, and retrieve alphanumeric data, bitmapped and vector-based graphics, and video and audio clips both compressed and uncompressed. The comprehensive, systematic approach of Multimedia Database Management Systems presents you with current and emerging methods for managing the increasing demands of multimedia databases and their inherent design and architecture issues.

Magic squares are among the more popular mathematical recreations. Over the last 50 years, many generalizations of “ magic ” ideas have been applied to graphs. Recently there has been a resurgence of interest in “ magic labelings ” due to a number of results that have applications to the problem of decomposing graphs into trees. Key features of this second edition include: - a new chapter on magic labeling of directed graphs -

applications of theorems from graph theory and interesting counting arguments · new research problems and exercises covering a range of difficulties · a fully updated bibliography and index This concise, self-contained exposition is unique in its focus on the theory of magic graphs/labelings. It may serve as a graduate or advanced undergraduate text for courses in mathematics or computer science, and as reference for the researcher.

LABOR AND EMPLOYMENT LAW: TEXT & CASES, 15TH EDITION, written by a nationally renowned White House labor arbitrator, offers comprehensive and objective coverage of labor and employment law topics that challenge readers to develop critical thinking skills through case analysis. In-depth chapters explore labor law topics, focusing primarily on the National Labor Relations Act, and are updated to include coverage of court systems and the role of administrative agencies in policymaking. Understand the majority views, the dissenting opinions, and the current laws that apply to these areas and follow the continued controversy over topics like discrimination law (including race discrimination, religious discrimination, national origin discrimination, age discrimination, sexual harassment, etc.) as well as worker's compensation and employee privacy (updated to include text messaging issues). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
