Mental Health Nursing Skills is a highly evidence-based, practical textbook designed so students can develop and apply the skills required for practice. Written in response to the Chief Nursing Officer's review of mental health nursing, this text translates theory into clear practical skills supported by useful examples, tips and online resources.

This title is directed primarily towards health care professionals outside of the United States. This book will help to identify the skills and resources that students already have and show how these can be developed into the essential skills needed for nursing in the mental health practice environment. Essential Mental Health Nursing Skills draws on the policy and theory underpinning mental health nursing but focusses on the practical aspects, providing an easily understandable guide to what to do and how to do it. It also provides a practical framework that can be applied in any setting. Examples are given to show how skills can be applied across the diversity of modern mental health nursing. Essential Mental Health Nursing Skills is also designed to be taken into the practice environment so that it can easily be referred to it when learning a skill.

Based on contemporary curricula and feedback from students and instructors, this Seventh Edition has been thoroughly

reorganized, revised, and updated, including six new chapters and a greater emphasis on evidence-based practice. Coverage includes brand-new or fully revised chapters on nursing values, attitudes, and self-awareness; the interview and assessment process; inpatient care settings; community/home settings; forensic psychiatric nursing; suicide and suicidal behavior; somatic therapies; and clients with medical illnesses. More than thirty new case vignettes with critical thinking questions encourage students to apply key concepts to practice. Plus, new illustrations, photographs, and special features help different types of learners understand symptoms, interventions, biologic mechanisms, and the characteristics and needs of distinct clients. A companion Website includes an NCLEX alternate item format tutorial, a Spanish-English audio glossary, psychotropic drug monographs, free journal articles, NCLEX-style chapter review questions, and Clinical Simulation case studies.

This ground-breaking textbook gathers contributions from service users, expert practitioners and leading academics to help students develop the core knowledge and skills they need to qualify as mental health nurses. Focusing in particular on helping students apply person-centred, compassionate and recovery-focused care, service-user voices and practical case studies are integrated throughout the book. Students are also given a rounded understanding of the key debates they will face in practice through the exploration of both bio-medical and psycho-social approaches. Key features include: Voices and case studies from real practising nurses and students help students apply knowledge to practice. Critical thinking activities, debates, and 'What's the Evidence' summaries help students develop higher level critical thinking and evidence based

stories (a selection of videos from Stories in Mental Health) • Weblinks Restructured and presented in 3 parts: Section 1: Positioning Practice describes the context and importance of nursing in mental health and includes a new chapter on self-care Section 2: Knowledge for Practice addresses the specialist practice of mental health nursing. Each chapter examines specific mental health conditions, assessment, nursing management and relevant treatment approaches Section 3: Contexts of practice features scenario-based chapters with a framework to support mental health screening, assessment, referral and support, across a range of clinical settings

Here's the must-know information LPN/LVN students need to care for patients with mental health disorders where they'll encounter them—in general patient care settings. An easy-to-read, conversational writing style shows you how to recognize and respond to the most important mental health issues. You'll also explore important communication techniques to use with your patients, ethical and legal issues, and alternative and complementary treatments.

Mental Health Nursing: Dimensions of Praxis 3rd Edition prepares student nurses by equipping them with innovative skills and essential knowledge for their mental health careers. It shows how to apply assessment processes to treatment practice, work with clients with a range of disorders, and apply nursing intervention strategies in order to achieve best practice outcomes. The cross section of expert authors who are both educators and professionals gives readers realistic perspectives and insights on how to work and care for consumers. This new edition has incorporated further engaging learning features to help students relate theory to practice, including multiple-choice quizzes which help them
