Mercury MerCruiser engines and drive systems are designed, tested, and built exclusively for the marine environment. That translates to best-in-class reliability, dependability, and long-lasting performance.

Mercury@MerCruiser@+Mercury-Marine

Mercury MerCruiser is world-renowned for creating innovations that provide boaters the best experiences on the water. From our pioneering sterndrive propulsion introduced at the Chicago Boat Show more than a half-century ago to today's joystick controls that give boaters the confidence and ability to pilot the boat of their dreams even under extreme conditions, Mercury MerCruiser is the undisputed leader in marine power and technology.

Mercury@MerCruiser@+Mercury-Marine

The Mercury MerCruiser 6.2L offers exceptional fuel efficiency. Wide band oxygen sensors continuously monitor oxygen levels, which enables the engine control module to deliver precisely the correct amount of fuel. The result is fuel economy that stretches your boat's range and your dollar.

Mercury@MerCruiser@-Inboards+Mercury-Marine

Mercury's Engine Guardian continually monitors critical sensors for any sign of a problem and immediately takes action, while the water-cooled Cool Fuel delivery system on the 8.2L Inboard engine prevents vapor lock. Rugged construction, including stainless-steel exhaust, ensures long-term, hassle-free operation.

Mercury@MerCruiser@-Inboards+Mercury-Marine

MerCruiser Sterndrive or Inboard-Outboard Engines (IOs) A MerCruiser sterndrive is essentially a car or truck style engine mounted inside the boat, lower in the hull. The engine is then connected through the transom, or back of the boat, to an outdrive unit that hangs down below the boat's bottom.

Mercury-Marine

SeaCore is a brand of sterndrive marine propulsion systems manufactured in the United States by MerCruiser. The SeaCore engine design utilizes materials, technologies, and systems, created specifically for Mercury Marine, to prevent galvanic corrosion within its engine, transom and drive.

Mercury-Marine-Wikipedia

As an example, the MerCruiser 4.2 litre or the MD706 range of marine engines can easily take around 50 – 65 hours to completely recondition including checking the coolers and heat exchangers. Because of the amount of time required to repair these engines, a lot of boat owners and boatyards prefer to entrust the work to a specialised Mercuriser repairer such as the VM Diesel Specialist.
