Multinational Banking And Global Capital Markets

Multinational bank activities are more limited in their scope than the activities of local banks and they tend to remain more restricted. In the past, the operation of multinational bank is limited by few factors in a host economy, such as, small capital base, insufficient physical and human capital and unfamiliarity in the host economy.

Global banking, local stress: How multinational banks ...

Since the presence of foreign banks in emerging economies has increased rapidly in recent years, and since the banking industry has become more global, the importance of internal capital markets in multinational banking has grown, especially, in transmitting financial shocks within financial conglomerates, across global banks, and across countries.

Multinational banking and the international transmission ...

Multinational bank subsidiaries that belong to a financially strong banking group expand their lending faster than subsidiaries that belong to a financially weaker banking group. The first prior reflects the substitution effect: parent banks use their internal capital market to let subsidiaries in fast-growing economies expand lending faster compared with subsidiaries in more slowly developing economies.
