Opengts Installation And Configuration Manual
I need someone who can help me (by remote) to install OpenGTS on a linux (CentOS 6) system. Help, means show and teach, so that i can write my own (step by step) manual for a futured installing. I don't need only a copy of the official installation and configuration manual witch is included in OpenGTS - i have that already.

This book shows how to build a "INFelecPHY GPS Unit" (IEP-GPS) tracking system for fleet management that is based on 3G and GPRS modules. This model should provide reliability since it deals with several protocols: 1) HTTP and HTTPS to navigate, download and upload in real time the information to a web server, 2) FTTP and FTTPS to handle in a non-real time the files to the web application, and 3) SMTP and POP3 to send and receive email directly from the unit in case of any alert. Similar to a mobile device, but without screen for display, it is multifunctional because it links to a GPRS module, a camera, a speaker, headphone, a keypad and screen.

This book presents selected, high-quality research papers from the International Conference on Electronic Systems and Intelligent Computing (ESIC 2020), held at NIT Yupia, Arunachal Pradesh, India, on 2 – 4 March 2020. Discussing the latest challenges and solutions in the field of smart computing, cyber-physical systems and intelligent technologies, it includes papers based on original theoretical, practical and experimental simulations, developments, applications, measurements, and testing. The applications and solutions featured provide valuable reference material for future product development.

Details the skills you need as a technical writer to create both printed and online content. This valuable reference describes the entire development process-planning, writing, visual design, editing, indexing, and production. You also get tips on how to write information that is more easily translated into other languages. You'll learn about the importance of following templates and about how structured authoring environments based on Extensible Markup Language (XML) streamline the content development process. This updated third edition features new information on the Darwin Information Typing Architecture (DITA) standard for structured authoring, and it explains the impact of Web 2.0 technologies-blogs, wikis, and forums-on technical communication.
