In the tradition of social studies innovator Peter Martorella, this readable, accessible text offers prospective teachers a comprehensive introduction to teaching social studies to middle and secondary school students. With the purpose of social studies being the development of reflective, competent, concerned citizens, the text first examines the origins and evolution of social studies and citizenship education across the United States. Following this, targeted chapters address the art, science, and craft of social studies teaching as a means for engaging learners in knowledge construction. In the final section, the authors look at ways to improve social studies instruction through the incorporation of emerging technologies, and explore the implications of the rich cultural diversity within our nation.

The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind: to present the most powerful social studies content and pedagogy for children in elementary school, to offer the material in simple and accessible ways, and to write in a first person active voice. The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools. Geography, history, government and the other social sciences are delivered into the palm of the new teacher's hand along with a suite of tools for bringing social studies to life in the classroom. The book is organized into three sections—the first orients the reader to the mission of social studies education to the increasingly diverse children we teach, the second concentrates on the curriculum, and the third deals with instruction, how we plan and teach this curriculum. Three central themes continue to pervade the book—democratic citizenship, diversity, and the social sciences—to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals. An exceptionally strong chapter on

multicultural issues (Chapter 2) helps future teachers truly understand the changing demographics of the American classroom. Abridged NCSS standards and their classroom applications are found at [www.myeducationlab.com](http://www.myeducationlab.com).

"*Social Studies and Young Children*" presents developmentally appropriate strategies for teaching social studies to young children, with a focus on NCSS and NAEYC standards and using trade books, activities, and other resources designed to reach young children. Written in an easy-to-understand style, the book weaves current research-based principles of developmentally appropriate practice throughout. Through the book's experiential, hands-on learning approach, teachers see how to reach young learners, pique their interest, and use their natural curiosity to develop more critical thinking. The developmental learning focus promotes the idea that by understanding how young children learn, teachers will be more successful in presenting material in a way that children are able to comprehend, further allowing them to build knowledge as they are developmentally able to make sense of the material. Cross-curricular teaching and learning is promoted through the inclusion of a list of trade books in each chapter. A variety of strategies, activities, resources, and key chapter sections illustrate the concepts and help students make the connections to daily classroom practice. The First Edition of "*Social Studies and Young Children*" includes: Students make the connections between the theory and learning of social studies. Chapter 1 presents helpful background information about learning theory, including an illustrative table that summarizes theorists and their ideas about young learners. Learning and understanding of the text concepts, diversity, and inclusion are enhanced through a variety of key chapter sections. Students become familiar with what children should be learning as they plan for learning goals. Included are 10 NCSS themes and relevant NAEYC standards listed in every chapter. An understanding of what is developmentally appropriate for teaching social studies content and concepts is accomplished through references to child development and DAP throughout the book. Concepts and ideas are illustrated and clarified. Numerous practical and useful examples, activities, and resource ideas relevant for different age groups appear at the end of each chapter. Teachers see how to provide relevant, appropriate assessment for young children in a full chapter devoted to the topic. (Chapter 9) Teachers see how to integrate social studies into the everyday lives of their students, and to teach social studies with other subjects through the book's interdisciplinary experiential method presented throughout.
