Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Using everyday jargon-free language, Designing Social Research guides you through the jungle of setting up a research study. Ian Greener provides guidance on how to practically plan your research and helps you to understand the underpinning methodological principles that should inform your decisions about the methods you plan to use. It will help you to assess the appropriateness of a range of methods and to understand the strengths and limitations of different approaches to research. Greener highlights key debates in the field, both philosophical and practical, and presents them in such a way that they remain constantly relevant to research practice. Coverage includes framing an effective research question/problem; examining the jargon of social research; the links between theory, methodology and method; the role of literature reviewing in research design; managing and planning the research process; sampling; qualitative designs; quantitative designs; mixed methods designs and data analysis.

Designing Clinical Research sets the standard for providing a practical guide to planning, tabulating, formulating, and implementing clinical research, with an easy-to-read, uncomplicated presentation. This edition incorporates current research methodology including molecular and genetic clinical research and offers an updated syllabus for conducting a clinical research workshop. Emphasis is on common sense as the main ingredient of good science. The book explains how to choose well-focused research questions and details the steps through all the elements of study design, data collection, quality assurance, and basic grant-writing. All chapters have been thoroughly revised, updated, and made more user-friendly.

English writing is acknowledged as an essential skill for critical thinking, learning, and expression, and most EFL learners find themselves struggling when writing in English due to a lack of writing skills, content knowledge, writing strategies, intrinsic motivation, and fluency development practice. This edited volume, covering innovative approaches such as e-learning, strategy-based instruction, metacognitive training, a minimal grammar approach, writing assessment, and a genre-based approach, aims to innovate writing instruction in Chinese speaking regions, which has traditionally been characterized by rigid, teacher-centered, test-oriented approaches. We aim for this edited volume to provide theoretical underpinnings as well as contemporary practical advice related to EFL writing instruction for Chinese speakers.

This edited collection focuses on the virtue theory and the ethics of social science research.

This is an essential book for everyone who wants to write clearly about any subject and use writing as a means of learning.

Qualitative researchers read journal articles, serve on masters' and doctoral committees, make careful decisions on whether conference proposals, manuscripts, or large-scale grant applications should be accepted or rejected; yet, best practices on how to do this work thoroughly and efficiently have gained little attention over the last few decades. Evaluating Qualitative Research provides expert insight and advice on how to evaluate the merit of qualitative research in the academic community. As one of the first works of literature to address this gap in the exploration of theory, practice, and reflection that comes with the evaluation of qualitative research, author Jeasik Cho constructs a typology of evaluation by examining actual information collected from a variety of websites and relevant journals. By analyzing a host of journals' established review guidelines and assessment apparatuses, Cho presents readers with the core criteria that stands out amongst these tools. As a result, readers will be able to confidently agree upon the standards for how to best evaluate qualitative research not only for their work but for the community at large.

This volume describes in detail teaching philosophies, curricular structures, research approaches and organizational models used in European countries. It offers concrete teaching strategies and examples: from individual tutorials to large classes, from face-to-face to web-based teaching, and addresses educational and cultural differences between writing instruction in Europe and the US.
