A replication study repeats a previous study to discover if its findings are reliable and/or can be generalised to other circumstances. This edited volume brings together a number of experts who argue in favour of a more central role for replication research in Second Language Acquisition and Applied Linguistics.

Although replicating previous research as a serious research methodology has only emerged onto the applied linguistics scene relatively recently, it has been a subject of interest for much longer. The result is greater confidence in the interpretation and application of findings and a strong foundation upon which to base the direction of future research.

Doing Replication Research in Applied Linguistics ...
Replication Research in Applied Linguistics. As a PhD student and a newcomer to the world of research I found Replication Research in Applied Linguistics to be a useful extra textbook for research courses at universities along with other sources the professors introduced. Most of the time the doctoral students are encouraged to try to make a contribution to the overall knowledge of the field when it comes to selecting a topic for their research by doing something totally new.

aspects of SLA, some of which rely more heavily on replication than others. Research in linguistics, for example, is not traditionally based on replication, in contrast to research in psychology (Polio and Gass , 1997). L2 research, however, is informed by linguistics, psychology, education, and even sociology. This interdisciplinary nature of SLA
