Building a successful product usually involves teams of people, and many choose the Scrum approach to aid in creating products that deliver the highest possible value. Implementing Scrum gives teams a collection of powerful ideas they can assemble to fit their needs and meet their goals. The ninety-four patterns contained within are elaborated nuggets of insight into Scrum's building blocks, how they work, and how to use them. They offer novices a roadmap for starting from scratch, yet they help intermediate practitioners fine-tune or fortify their Scrum implementations. Experienced practitioners can use the patterns and supporting explanations to get a better understanding of how the parts of Scrum complement each other to solve common problems in product development. The patterns are written in the well-known Alexandrian form, whose roots in architecture and design have enjoyed broad application in the software world. The form organizes each pattern so you can navigate directly to organizational design tradeoffs or jump to the solution or rationale that makes the solution work. The patterns flow together naturally through the context sections at their beginning and end. Learn everything you need to know to master and implement Scrum one step at a time—the agile way.

The Encyclopedia of Library and Information Sciences, comprising of seven volumes, now in its fourth edition, compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries. This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online. The new fourth edition, which includes 55 new entries and 60 revised entries, continues to reflect the growing convergence among the disciplines that influence information and the cultural record, with coverage of the latest topics as well as classic articles of historical and theoretical importance.

With diet, health, and food safety news making headlines on a regular basis, the ability to separate, identify, and analyze the nutrients, additives, and toxicological compounds found in food and food components is more important than ever. This requires proper training in the application of best methods, as well as efforts to improve existing methods.

Young people want to go to college for the big social, coming of age experience but if you don't come from a wealthy family, I say skip your fantasies of the college fun experience that you get from movies, get a job while you go to either a community college or take online courses for the first two years then attend a local college live in the flesh. When I was young, college was cheap and fun. I think the atmosphere has changed. It's more expensive now. Pick a practical major then focus on getting that degree as quickly as possible to start making money. You can focus on your artsy explorations anytime. It's all about making money. Make a plan and stick to it. Chapter 1. Money for College Paying for College One-Liners Take as many lower division credits as possible from a community college or online where it's cheaper. All that employers will consider is the degree itself and the name of the institution that eventually grants the degree.

The biggest thing in life for most people aside from personal relationships and health is to earn a living. This comes down to four things: 1.) Education 2.) Finding a job, keeping it 3.) Starting and running a business 4.) State of being, are you capable of being out there, around people These are all huge areas. I cover them all somewhere through all the books I've written because I know the real world and I know it's not the glittery world you can see on TV at anytime but a lot of people, especially young ones, don't know this then when the real world hits them straight-on for the first time, it's like a spear piercing through their being. Life is hard. I wrote the "People Power" books because I lived a fun, easy life until a few tragedies hit then I knew anybody can end up sick, unemployed, feeling hopeless, uninspired and destitute.

This book provides a number of effective tools to aid in the recovery of LGBTQIA historic material by providing extensive glossary and non-glossary written descriptions, and how to use those terms and phrases in searching effectively online and offline. Researching hidden and forbidden people from the past can be extremely difficult. Terminology used to write about LGBTQ+ people shifts over time, legal terminology enforces certain set terms which some writers use but others reject to avoid informing or disgusting a reading public. Often written descriptions contain no set terminology at all. How then can LGBTQ+ people be found in historic records? This book provides practical tools for a researcher wanting to uncover material from online or hard copy sources, including: keyword/s covering various sexual orientations and gender diversity, along with how and when to use them; tips for effective searching in online newspaper archives; how to use genealogy, auction and social media sites to uncover information; searching in online and physical libraries; advice on researching in physical archives and the types of collections which can yield results; and researching in museums collecting and displaying LGBTQ+ content. Making use of a straightforward and jargon free style, this is a short and accessible guide to doing historical research on Gay, Lesbian, Trans, Queer and non-normative research subjects. This is a useful resource for students and scholars alike in Archive Studies History, Gender and Sexuality Studies.
