DESIGN BASICS- COMPLETE

Smacna Hvac Duct Construction Standards

If the designer does not designate pressure class for duct construction on the contract drawings, the basis of compliance with the SMACNA HVAC Duct

Construction Standards is as follows: 2" (500 Pa) w.g. for all ducts between the supply fan and variable volume control boxes and 1" (250 Pa) w.g. for all other ducts of any application.

9-12-19 - SMACNA

ANSI, the American National Standards Institute, has accredited SMACNA as a standards-setting organization. SMACNA standards and manuals address all facets of the sheet metal and HVAC industry – including duct construction and installation, indoor air quality, energy recovery, roofing and architectural sheet metal, welding, and commissioning.
