While the relationship between sport and religion is deeply rooted in history, it continues to play a profound role in shaping modern-day societies. This edited collection provides an inter-disciplinary exploration of this relationship from a global perspective, making a major contribution to the religious, social scientific and theological study of sport. It discusses the dialectical interplay between sport and Christianity across diverse cultures, extending beyond a Western perspective to include studies from Africa, South America and Asia, as well as Europe, the UK and the US. Containing contributions from leading experts within the field, it reflects on key topics including race, gender, spirituality, morality, interfaith sport clubs, and the significance of sport in public rituals of celebration and mourning. Its chapters also examine violent sports such as boxing and mixed martial arts, as well as reflecting on the cult of sporting celebrity and the theology of disability sport. Truly international in scope, *Global Perspectives on Sports and Christianity* is fascinating reading for all those interested in the study of sport, sociology and religion.

Although Critical Race Theory (CRT) has been used to analyze difficult issues of race and racism in education for over ten years, the function of CRT in educational research is still not entirely clear. By bringing together the voices of various CRT scholars and education experts, this volume presents a comprehensive chorus of answers to the question of how and why CRT should be applied to educational scholarship. The collected chapters address CRT's foundations in legal theory, current applications of CRT, and possible new directions for CRT in education. Appropriate for both students curious about CRT and established CRT scholars, *Critical Race Theory in Education* is a valuable guide to how CRT can help us better understand and seek solutions to educational inequity.

This distinctive Handbook covers the breadth of sports and media scholarship, one of the up-and-coming topics bridging media entertainment, sports management, and popular culture. Organized into historical, institutional, spectator, and critical studies perspectives, this volume brings together the work of many researchers into one quintessential volume, defining the full scope of the subject area. Editors Arthur Raney and Jennings Bryant have recruited contributors from around the world to identify and synthesize the research representing numerous facets of the sports-media relationship. As a unique collection on a very timely topic, the volume offers chapters examining the development of sports media; production, coverage, and economics of sports media; sports media audiences; sports promotion; and race and gender issues in sports and media. Unique in its orientation and breadth, the *Handbook of Sports and Media* is destined to play a major role in the future development of this fast-growing area of study. It is a must-have work for scholars, researchers, and graduate students working in media entertainment, media psychology, mass media/mass communication, sports marketing and management, popular communication, popular culture, and cultural studies.

This book offers a distinctive introduction to understanding the position of sport in consumer society. Drawing on recent developments in sociological theory and research, particularly in relation to debates about culture and consumption, the book examines how sport - as both recreational practice and commercial spectacle - has become more central to the capitalist 'economies of signs and space'. Containing up-to-date research findings and identifying key issues in the study and politics of sport in consumer culture, this is essential reading for all students seeking to broaden their understanding of

sport in society.

Taking examples from the United States and Canada, this comprehensive text offers compassionate and critical accounts of the Native American sporting experience. It challenges popular images of indigenous athletes and athletics; it explores Native American participation in and appropriation of EuroAmerican sports; and it unpacks social categories, particularly gender, race and heritage and their implications for understanding Native Americans and sport in North America. Contributors discuss the interplay of power and possibility, difference and identity, representation and remembrance that have shaped the means and meanings of American Indians playing sport. Included in this book are discussions on: continuity and change, the place of sport in the survival and adaptation of indigenous beliefs and behaviours the play of power and the power of play within indigenous communities, intercultural spaces, and American popular culture the contradictions and conditions of possibilities sport has offered American Indians the politics and poetics of identity the axes of difference structuring the indigenous sporting experience, particularly, gender, race, and nationalism representations and stagings of Indianness in the context of sport.

Looking toward a future with increasingly hybridized media offerings, *Sports Media: Transformation, Integration, Consumption* examines sports media scholarship and its role in facilitating understanding of the increasingly complex world of sports media. Acknowledging that consumer demand for sports media content has influenced nearly every major technology innovation of the past several decades, chapters included herein assess existing scholarship while posing important future questions about the role sports media will play in the daily lives of sports fans worldwide. Contributions from well-known scholars are supplemented by work from younger researchers doing new work in this area. Developed for the Broadcast Education Association's Electronic Media Research series, this volume will be required reading for graduate and undergraduate students in media, communication, sociology, marketing, and sports management, and will serve as a valuable reference for future research in sports media.
