North Holland has dozens of historic town centres that are worth visiting. The most well-known is obviously the historic centre of Amsterdam, which became a UNESCO World Heritage Site in 2010. Its characteristic architecture and lovely canals (known as grachten) demand some pictures to be taken. But there are a lot more of them in the province — every region of North Holland at least has one ...

LLISTAT DE LLIBRES DE TEXT CURS 2020/2021 ATENCIÓ – XTEC

We were just there with my 11 yr old son and 12 yr old daughter. We enjoyed Anne Frank's House. We all read the book before going. Well, to be honest, my son read a book ABOUT the book (he likes that kind of stuff better) and my daughter read half the book. I was only one to read the whole diary lol. Still, we had lots of discussions before going.

This book constitutes the refereed proceedings of the 8th International Conference on Ubiquitous Computing and Ambient Intelligence, UCAmI 2014, held in Belfast, UK, in December 2014. The 57 papers presented together with 7 papers of the workshop AmIUA 2014, 8 papers of the workshop IoT 2014, 7 papers of the workshop EUSPAI 2014, and 6 papers of the workshop VSS 2014 were carefully reviewed and selected from numerous submissions. The papers are grouped in topical sections on key application domains for ambient intelligence, human interaction in ambient intelligence, ICT instrumentation and middleware support for smart environments and objects, adding intelligence for environment adaption, and security and privacy issues in AAL.

Higher Education systems and universities worldwide are constantly being transformed due to ever-changing practices and policies. Recent research reveals the challenges between society and higher education continue to grow. New Voices in Higher Education Research and Scholarship explores the role of higher education in today's society. It discusses the rapidly changing nature of higher education around the globe, especially the relationship between higher education and social development. This reference book will be of use to policymakers, academicians, researchers, students, and government officials.

This work derives from a conference discussing the history of computing in education. This conference is the first of hopefully a series of conferences that will take place within the International Federation for Information Processing (IFIP) and hence, we describe it as the First Conference on the History of Computing in Education (HCE1). These proceedings represent a collection of works presented at the HCE1 Conference held in association with the IFIP 2004 World Computer Congress held in Toulouse, France. Contributions to this volume range from a wide variety of educational perspectives and represent activities from four continents. The HCE1 conference represents a joint effort of the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE1 Conference brings to light a broad spectrum of issues and spans four continents. It illustrates topics in computing education as they occurred in the "early days" of computing whose ramifications or overtones remain with us today. Indeed, many of the early challenges remain part of our educational tapestry; most likely, many will evolve into future challenges. Therefore, this work provides additional value to the reader as it will reflect in part the future development of computing in education to stimulate new ideas and models in educational development.

This book offers a new methodological framework for the CLIL classroom, focusing on how to guide input and support output. Full of real-life examples and practical guidelines, the book provides support to both novice and experienced CLIL teachers. Areas covered include: the language used in CLIL; CLIL teacher training; materials design for CLIL; assessment in CLIL. Extra resources are available on the website: www.oup.com/elt/teacher/clil Phil Ball is a CLIL author and teacher trainer based in northern Spain. Keith Kelly is a writer and speaker on CLIL worldwide, and is based in Plovdiv, Bulgaria. John Clegg is a textbook author and CLIL consultant based in London.

Stewart's CALCULUS: EARLY TRANSCENDENTALS, Fifth Edition has the mathematical precision, accuracy, clarity of exposition and outstanding examples and problem sets that have characterized the first four editions. Stewart retains the focus on problem solving and the pedagogical system that has made the book a favorite of students and instructors in a wide variety of colleges and universities throughout the world. The structure of CALCULUS: EARLY TRANSCENDENTALS, Fifth Edition, remains largely unchanged, the sole exception being that the review of inverse trigonometric functions has been moved from an appendix to Section 1.6. Stewart has made hundreds of small improvements: new examples, additional steps in existing examples, updating of data in existing examples and exercises, new phrases and margin notes to clarify the exposition, references to other sources and web sites, redrawn art, and references to the TEC CD (Tools for Enriching Calculus). These refinements ensure that students and instructors using this text are using the best resource available. The number of pages in the book, however, remains unchanged from the 4th edition. This edition is complemented with an expanded array of supplementary material for both students and instructors. These best-selling texts differ from CALCULUS, Fifth Edition in that the exponential and logarithmic functions are covered earlier. In the Fifth Edition of CALCULUS, EARLY TRANSCENDENTALS these functions are introduced in the first chapter and their limits and derivatives are found in Chapters 2 and 3 at the same time as polynomials and other elementary functions.

Stewart's CALCULUS: EARLY TRANSCENDENTALS, Fifth Edition, Volume Two has the mathematical precision, accuracy, clarity of exposition and outstanding examples and problem sets that have characterized the first four editions. In this Fifth Edition, Stewart retains the focus on problem solving and the pedagogical system that has worked so well for students in a wide variety of colleges and universities throughout the world. He has made refinements to the exposition and examples to ensure that students have the best materials available. Further support for students and instructors is now available through a vast array of supplementary material. This new one-term version of the text provides more options for choosing a text to fit the course needs, along with the flexibility to select the resources that you want with the text.
