Test Driven Web Development with Spring Boot & React

Test Driven Development (TDD) is a strategy for ensuring code is sufficiently considered. A piece of functionality (typically a component in React, or a utility) is crafted not by writing code first, but by writing one or more tests (specs) first. Only when a test spec has been written can the code to satisfy the test be written.

Test-driven development (TDD) is a process that has been documented considerably over recent years. A process of baking your tests right into your everyday coding, as opposed to a nagging afterthought, should be something that developers seek to make the norm, rather than some ideal fantasy. I will introduce the core concepts of TDD.
