"The most ambitious and important new book is The Red Queen among Organizations, by William P. Barnett. . . . [I]t is the best strategy book of the year because of its main insights: Competition concerns relative performance, not absolute performance; a company's competitiveness is context specific, and contexts can change, giving rise to the competency trap; learning comes from competing, not isolation from competition; and differentiation is desirable as a way to secure rents, but must be ...

~~The Red Queen among Organizations : William P. Barnett ...~~

Our theory, labeled Red-Queen competition, is based on the idea that competition both de-selects less-fit organizations and stimulates organizational learning. Organizations that have survived competition, then, are more fit, and so in turn they generate stronger competition.

There's a scene in Lewis Carroll's *Through the Looking Glass* in which the Red Queen, having just led a chase with Alice in which neither seems to have moved from the spot where they began, explains to the perplexed girl: "It takes all the running you can do, to keep in the same place." Evolutionary biologists have used this scene to illustrate the evolutionary arms race among competing species. William Barnett argues that a similar dynamic is at work when organizations compete, shaping how firms and industries evolve over time. Barnett examines the effects--and unforeseen perils--of competing and winning. He takes a fascinating, in-depth look at two of the most competitive industries--computer manufacturing and commercial banking--and derives some startling conclusions. Organizations that survive competition become stronger competitors--but only in the market contexts in which they succeed. Barnett shows how managers may think their experience will help them thrive in new markets and conditions, when in fact the opposite is likely to be the case. He finds that an organization's competitiveness at any given moment hinges on the organization's historical experience. Through Red Queen competition, weaker competitors fail, or they learn and adapt. This in turn heightens the intensity of competition and further strengthens survivors in an ever-evolving dynamic. Sex is as fascinating to scientists as it is to the rest of us. A vast pool of knowledge, therefore, has been gleaned from research into the nature of sex, from the contentious problem of why the wasteful reproductive process exists at all, to how individuals choose their mates and what traits they find attractive. This fascinating book explores those findings, and their implications for the sexual behaviour of our own species. It uses the Red Queen from 'Alice in Wonderland' – who has to run at full speed to stay where she is – as a metaphor for a whole range of sexual behaviours. The book was shortlisted for the 1994 Rhone-Poulenc Prize for Science Books. 'Animals and plants evolved sex to fend off parasitic infection. Now look where it has got us. Men want BMWs, power and money in order to pair-bond with women who are blonde, youthful and narrow-waisted ... a brilliant examination of the scientific debates on the hows and whys of sex and evolution' Independent.

Making strategy requires undertaking major—often irreversible—decisions aimed at long-term success in an uncertain future. All leaders must formulate a clear course of action, yet many lack confidence in their ability to think systematically about their strategy. They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts. Making Great Strategy resolves these challenges with a straightforward, readily applicable framework. Jesper B. Sørensen and Glenn R. Carroll show that one factor underlies all sustainably successful strategies: a logically coherent argument that connects resources, capabilities, and environmental conditions to desired outcomes. They introduce a system for formulating and managing strategy through a set of three core activities: visualization, formalization and logic, and constructive argumentation. These activities can be implemented in any organization and are illustrated through examples and case studies from well-known companies such as Apple, Walmart, and The Economist. This book shows that while great strategic thinking is hard, it is not a mystery. Widely applicable and relevant for managers and leaders at all levels, especially executive teams charged with setting the course of their organizations, it is essential reading for anyone faced with practical problems of strategic management.

Frankie Bailey introduces readers to a fabulous new protagonist and an Alice in Wonderland-infused crime in this stunning mystery, which kicks off an exciting new series set in the near future. The year is 2019, and a drug used to treat soldiers for post-traumatic stress disorder, nicknamed "Lullaby," has hit the streets. Swallowing a little pill erases traumatic memories, but what happens to a criminal trial when the star witness takes a pill and can't remember the crime? When two women are murdered in quick succession, biracial police detective Hannah McCabe is charged with solving the case. In spite of the advanced technology, including a city-wide surveillance program, a third woman is soon killed, and the police begin to suspect that a serial killer is on the loose. But the third victim, a Broadway actress known as "The Red Queen," doesn't fit the pattern set by the first two murders. With the late September heat sizzling, Detective Hannah McCabe and her colleagues on the police force have to race to find the killer in a tangled web of clues that involve Alice in Wonderland, The Wizard of Oz, and Abraham Lincoln's assassination. Fast-paced and original, this is a one-of-a-kind mystery from an extremely talented crime writer.
