This book considers the political and constitutional consequences of Vieth v. Jubelirer (2004), where the Supreme Court held that partisan gerrymandering challenges could no longer be adjudicated by the courts. Through a rigorous scientific analysis of US House district maps, the authors argue that partisan bias increased dramatically in the 2010 redistricting round after the Vieth decision, both at the national and state level. From a constitutional perspective, unrestrained partisan gerrymandering poses a critical threat to a central pillar of American democracy, popular sovereignty. State legislatures now effectively determine the political composition of the US House. The book answers the Court's challenge to find a new standard for gerrymandering that is both constitutionally grounded and legally manageable. It argues that the scientifically rigorous partisan symmetry measure is an appropriate legal standard for partisan gerrymandering, as it logically implies the constitutional right to individual equality and can be practically applied.

With its strong, engaging politics are pertinent theme and current, cutting-edge coverage, UNDERSTANDING POLITICS: IDEAS, INSTITUTIONS, AND ISSUES, Eighth Edition, is the proven best-selling text for the introduction to political science course. Thomas Magstadt fascinates students with his coverage of three fundamental premises: 1) politics is a pervasive force in modern society; 2) government is too important to be left in the hands of a few; and 3) in a democracy, everyone has both the opportunity and the obligation to participate in public life. The eighth edition of UNDERSTANDING POLITICS: IDEAS, INSTITUTIONS, AND ISSUES focuses on such pertinent concepts as democracy, dictatorship, citizenship, voting behavior, elections, leadership, ideologies, war, revolution, world politics, and public policy--fundamental concepts that provide students with a view of politics and economics that is at once lucid, nuanced, and empowering. Messengers of the Right tells the story of the media activists who built the American conservative movement and transformed it into one of the most significant and successful movements of the twentieth century—and in the process remade the Republican Party and the American media landscape.

Combining thematic chapters and country cases, Comparative Politics Today: A World View sets the standard for introducing the field of comparative politics and for illustrating how to compare the world's political systems. This text begins by laying out a proven analytical framework that is accessible for students new to the field; it is then consistently implemented in twelve authoritative country cases not only to introduce students to what politics and governments are like around the world but to also understand the importance of their similarities and differences. Written by leading comparativists and area study specialists, Comparative Politics Today helps to sort through the world's complexity and to recognize patterns that lead to genuine political insight.

The authors of this ambitious book address a fundamental political question: why are leaders who produce peace and prosperity turned out of office while those who preside over corruption, war, and misery endure? Considering this political puzzle, they also answer the related economic question of why some countries experience successful economic development and others do not. The authors construct a provocative theory on the selection of leaders and present specific formal models from which their central claims can be deduced. They show how political leaders allocate resources and how institutions for selecting leaders create incentives for leaders to pursue good and bad public policy. They also extend the model to explain the consequences of war on political survival. Throughout the book, they provide illustrations from history, ranging from ancient Sparta to Vichy France, and test the model against statistics gathered from cross-national data. The authors explain the political intuition underlying their theory in nontechnical language, reserving formal proofs for chapter appendixes. They conclude by presenting policy prescriptions based on what has been demonstrated theoretically and empirically.
