Compared to the Middle Ages, the Renaissance is brief—little more than two centuries, extending roughly from the mid-fourteenth century to the end of the sixteenth century—and largely confined to a few Italian city states. Nevertheless, the epoch marked a great cultural shift in sensibilities, the dawn of a new age in which classical Greek and Roman values were "reborn" and human values in all fields, from the arts to civic life, were reaffirmed. With this volume, Eugenio Garin, a leading Renaissance scholar, has gathered the work of an international team of scholars into an accessible account of the people who animated this decisive moment in the genesis of the modern mind. We are offered a broad spectrum of figures, major and minor, as they lived their lives: the prince and the military commander, the cardinal and the courtier, the artist and the philosopher, the merchant and the banker, the voyager, and women of all classes. With its concentration on the concrete, the specific, even the anecdotal, the volume offers a wealth of new perspectives and ideas for study.

Mouse likes to look in his friends' diapers, and when his friends decide to look in his diaper, they are surprised by what they find.

Introducing a companion picture book to the award-winning picture book, *The Journey*, from rising star Francesca Sanna. When a young immigrant girl has to travel to a new country and start at a new school, she is accompanied by her Fear who tells her to be alone and afraid, growing bigger and bigger every day with questions like "how can you hope to make new friends if you don't understand their language?" But this little girl is stronger than her Fear. A heart-warming and timely tale from the bestselling author and illustrator of *The Journey*, this book shows us the importance of sharing your Fear with others--after all, everyone carries a Fear with them, even if it's small enough to fit into their pocket!

In this groundbreaking book, Taylor and Hilger lay bare the secrets of the Poker Mindset: seven core attitudes and concepts that ensure you have the optimal emotional, psychological, and behavioral framework for playing superior poker. The Poker Mindset deeply explores vital topics that most poker books only touch upon: - Tilt: What it really is, why and when you are most prone to it, and how you can avoid it.- Bankroll: A complete examination of bankroll management from a technical, but more importantly, from a psychological and emotional viewpoint.- Opponents: How to determine your competitors' mental and emotional processes so that you can

dominate, out think and outplay them.- Downswings: Every poker player experiences them, but you will truly understand and be armed against low ebbs when they occur.- Bad Beats: The Poker Mindset will enable you to overcome the trauma of bad beats and losing big pots. Poker is a fun game, but it is even more fun when you win. The Poker Mindset may be the most valuable poker book you will ever read. Embrace its concepts and you can overcome the unseen obstacles that are limiting your success at the table.

This volume offers an empirically rich, theoretically informed study of the shifting intersections of nation/alism, gender and sexuality. Challenging a scholarly legacy that has overly focused on the masculinist character of nationalism, it pays particular attention to the people and issues less commonly considered in the context of nationalist projects, namely women and sexual minorities. Bringing together both established and emerging researchers from across the globe, this multidisciplinary and comparison-rich volume provides a multi-sited exploration of the shifting contours of belonging and Otherness generated by multifarious nationalisms. The diverse, and context specific positionings of men and women, masculinities and femininities, and hegemonic and non-normative sexualities, vis- à -vis nation/alism, are illuminated through a vibrant array of contemporary theoretical lenses. These include historical and feminist institutionalism, post-colonial theory, critical race approaches, transnational and migration theory and semiotics.

Acclaimed film scholar Francesco Casetti situates the cinematic experience within discourses of 20th century modernity. He suggests that film defined a unique gaze not only because it recorded many of the centuries most important events, but also because it determined the manner in which they were received.
