The detergent dispenser holds the dishwasher capsule in place until the right point in
the cycle to release it. If the dispenser is damaged, not closing or stuck closed it can
be removed from the machine and a new one clipped in place.

whirlpool dishwasher not draining - DoItYourself.com ...

Around 80 million homes in the U.S have a dishwasher, and it is not uncommon to come across issues, such as the lights staying on. If your dishwasher lights stay on, try cleaning and check if a button is stuck. Another thing to do is check if there is a button that was pushed by mistake.

Dishwasher Lights Stay On - Ready To DIY

The water inlet valve is what lets the water into your dishwasher. The water line is hooked to it and a solenoid activates to let the water into the dishwasher. The dishwasher may not fill with water if the water valve filter screen is blocked by debris. Get access to the water inlet valve and cleaning it thoroughly.
